

Simplifying reimbursement claims process for you

Reimbursement claim request is when you pay for your medical treatment first and then raise a request with your Insurer for reimbursement or repayment of the incurred expenses as per your policy terms and condition. You can avail this facility at both network and non-network hospitals.

I don't know if I am at a network or a non-network hospital. How can I be sure?

- Please [click here](#) to know the network hospital.
- Please [click here](#) to know the blacklisted hospital; please scroll to the end of the page. Claim requests from the hospitals mentioned in this list will not be approved.

I am at a non-network hospital. Will my claim be rejected?

If you're treated at a non-network hospital, then you need to take care of the following:

- The hospital has at least 15 inpatient beds and is not a day care centre only.
- The hospital is registered with the local authorities under the Clinical Establishments (Registration and Regulation) Act, 2010 and has a valid Hospital Registration Certificate. You also need to collect the certificate along with claim documents at the time of discharge.
- The hospital has registered medical practitioner(s) (MBBS) available round the clock.
- The hospital has a defined / published tariff or schedule of charges and bills you accordingly. You also need to collect a copy of hospital tariff along with claim documents at the time of discharge.
- The hospital maintains all inpatient medical and billing records, which should be available for claim verification if needed. You need to collect the discharge summary, indoor case papers, investigation reports, final hospital bill, and pre-numbered paid receipt along with other documents at the time of discharge.

What is the process to raise a reimbursement claim request?

Reimbursement claim request must be raised within 30 days of discharge from the hospital.
